

Schedule M

tiskʷət Retention Areas

Table 1. Description of retention harvest system and minimum stand retention

Area Name	Column 1 Harvest area to use retention system over rolling 5-year average	Column 2 Minimum stand retention over rolling 5-year average*
Basic	≥50%	15%
Habitat	≥60%	20%
Special	≥70%	25%

** In any particular development area, a minimum of 7% stand retention is required. In development areas greater than 20 ha where a clearcut with reserve silvicultural system is implemented, a minimum of 7% stand retention is required that is internal to the cutblock.*
